

The Intellivision[®] Entertainment Computer System

MATTTEL ELECTRONICS[®]

The Intellivision® Entertainment Computer System

Intellivision, with its superior graphics, resolution, control and cartridge range has been accepted worldwide as *The Video Entertainment System*.

The recent introduction of Intellivoice, making it the first system to integrate human speech into a complete network of advanced video games has already firmly positioned Intellivision light years ahead of it's competition.

NOW Mattel introduce the Intellivision Entertainment Computer system — new peripheral hardware and software to further expand the capabilities of the Intellivision Master Component.

The Intellivision® Computer Adaptor

The Intellivision Computer Adaptor simply plugs into the master component. The adaptor incorporates a simple BASIC program and a 2 K RAM (expandable to 34 K) increasing Intellivision's memory. It even expands its sound capabilities.

But the Computer Adaptor really proves itself when complimented by the

comprehensive range of Intellivision peripherals.

- Expands Intellivision to 34 K RAM.
- Four player game capability.
- Incorporates BASIC program.
- Allows interface with either numeric or music keyboards.

The Intellivision® Computer Keyboard

The addition of the Intellivision Computer Keyboard to the Intellivision Master Component and Adaptor provides a powerful home computer.

With all the fun of Intellivision. The Intellivision Computer Keyboard looks just like a standard typewriter keyboard. With 49 keys to give you a complete alpha-numeric input device and a touch you can feel. And it's fully programmable. Since the simple BASIC language is already built into the system, the Intellivision Entertainment computer can be easily programmed to perform the functions of a sophisticated home computer.

The Intellivision Computer Keyboard can also make learning a game for children. With a unique colour-coded graphics approach to teach BASIC

programming. And home educational games that will turn the computer into a full-time tutor.

The Intellivision Keyboard even makes playing more advanced. With a whole new generation of super games built around 3-dimensional graphics and more challenging action. And video games that can even be programmed by the user.

- Develops Intellivision master component into a powerful home computer.
- Full 49 key alpha-numeric input.
- Teaches BASIC programming.
- Unique colour-coded graphics.
- Editing facility.
- User programmable.

The Intellivision® Music Synthesizer

The Intellivision Music Synthesizer makes learning and playing music easy, fun and exciting.

The full-size, 49-key music keyboard, has the same look, feel and touch as a traditional organ keyboard. Which makes it all the easier for children and adults to relate their skills directly to a piano or an organ.

Together with the Intellivision Computer Adaptor, and Master Component, the keyboard becomes a six-note, polyphonic synthesizer. A unique instrument that helps all the members of the family learn to read music. Compose their own melodies. Even learn to play their favourite songs by playing a video game.

- Makes learning music easy, fun and exciting.
- 49-key keyboard.
- 6 note polyphonic synthesizer.
- A unique audio-visual interplay.

Intellivision® Entertainment Computer System Software

Mattel Electronics has justifiably earned a Worldwide reputation for developing software programs that lead the industry in outstanding graphics, superior sound effects, realistic action and sophisticated game play.

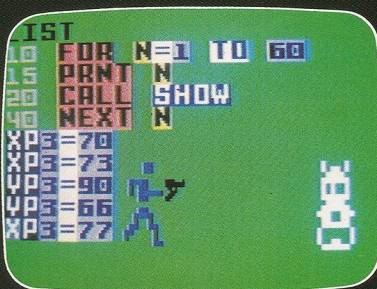

1983 issues

The Intellivision Computer Software is the best ever written.

The library includes terrific video games, fun computer programming games, innovative musical games and entertaining educational games. And every one is user programmable.
